

## READY-TO-USE HYPOCHLOROUS ACID (HOCl) SOLUTION

No dilution required when used as directed on the label.

### 3-in-1 disinfectant solution

Cleans, disinfects, and deodorizes using hypochlorous acid (HOCl), a well-recognized antimicrobial agent.

Designed for professional sanitation protocols, SAFE provides a ready-to-use solution that supports effective surface disinfection when applied according to the label instructions.

## Key benefits

- 3-in-1 in one step: disinfectant + cleaner + deodorizer.
- Cleaner formula: no VOCs, no added fragrance, no NPE.
- Environmentally responsible: breaks down harmlessly into salt and water.
- Use with standard safety practices. Follow the label and SDS. Avoid contact with eyes and skin. Use appropriate PPE as required by your workplace protocol.

## Dilution

- **Ready-to-use solution. Apply as directed on the label. Do not dilute unless specified in your protocol. Do not mix with other chemicals.**

## Main applications

- Frequently touched surfaces such as door handles, switches, counters, and workstations
- Hard, non-porous surfaces compatible with water
- Suitable for routine sanitation and odour control in professional environments
- Supports regular maintenance in areas where disinfection is performed intermittently

## ✓ Directions for use

- Pre-clean heavily soiled surfaces prior to application.
- Apply using a coarse spray or a clean, damp cloth.
- Ensure the surface remains visibly wet for 10 minutes to achieve full disinfection (contact time).
- Allow to air dry. No rinsing or wiping is required, except where specified below.
- If a white residue appears after repeated applications, this is harmless dried salt and can be removed with a dry cloth.
